

# Project Engineer Level 1

Closing date: 31<sup>st</sup> of January

Region: Ireland

### The ROLE in summary

New positions have become available for Engineers supporting Tokyo Electrons operations in Kildare. The positions will provide high quality service and installation support across numerous customers within the region. As the customer based is diverse, applicants should be customer focused and comfortable to work within a changing environment. The positions require a high level of flexibility and may involve international travel. Successful candidates should ideally have gained experience on either Clean Track or Furnace tools but will receive full training as required to fulfil the role.

### Office base & Travelling

- Maynooth Office
- Travel may be required from time to time

### Type of Contract
